

CPSC 304: Introduction to Relational Databases

Tutorial #2: Logical Database Design

1) 1:1

$X(\underline{K1}, K2, A1)$ ($K2$ needs to be unique)

$Y(\underline{K2}, A2)$

or

$X(\underline{K1}, A1)$

$Y(\underline{K2}, K1, A2)$ ($K1$ needs to be unique)

2) 1:M

$X(\underline{K1}, A1)$

$Y(\underline{K2}, K1, A2)$

CPSC 304: Introduction to Relational Databases

Tutorial #2: Logical Database Design

3) M:N (Binary Relationship)

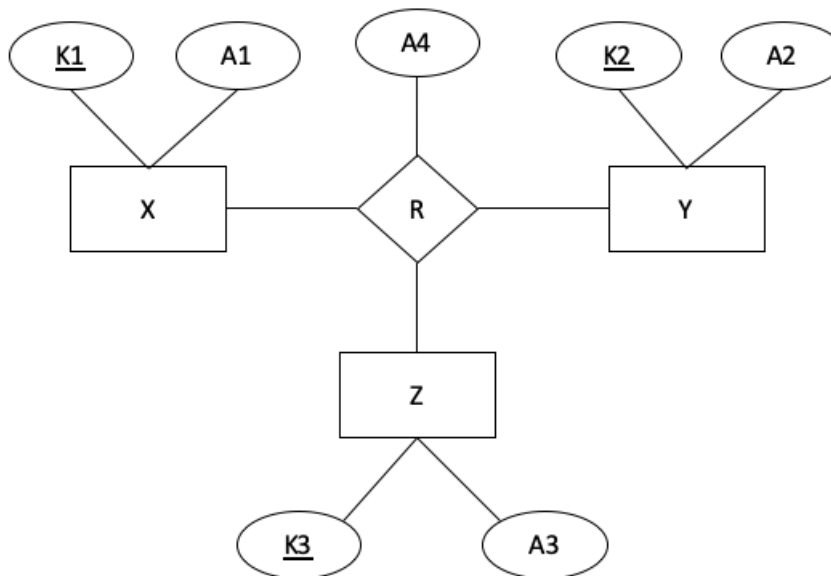

$X(\underline{K1}, A1)$

$Y(\underline{K2}, A2)$

$R(\underline{K1}, \underline{K2}, A3)$

4) M:N (Ternary Relationship)

$X(\underline{K1}, A1)$

$Y(\underline{K2}, A2)$

$Z(\underline{K3}, A3)$

$R(\underline{K1}, \underline{K2}, \underline{K3}, A4)$

CPSC 304: Introduction to Relational Databases

Tutorial #2: Logical Database Design

5) 1:M Entity with Total Participation

$X(\underline{K1}, A1)$

$Y(\underline{K1}, \underline{K2}, A2)$ ($K1$ cannot be null)

6) 1:M Weak Entity with Total Participation (assume that $A2$ is the partial key)

$X(\underline{K1}, A1)$

$Y(\underline{K1}, \underline{A2}, A3)$

7) 1:1 and 1:M Unary Relationship

$X(\underline{K1}, A1, \underline{K2})$ (if it is 1:1, then we require $K2$ to be unique) OR

$X(\underline{R1-K1}, A1, \underline{R2-K1})$ (if it is 1:1, then we require $R2-K1$ to be unique)

CPSC 304: Introduction to Relational Databases

Tutorial #2: Logical Database Design

8) M:N Unary Relationship

$X(\underline{K1}, A1)$

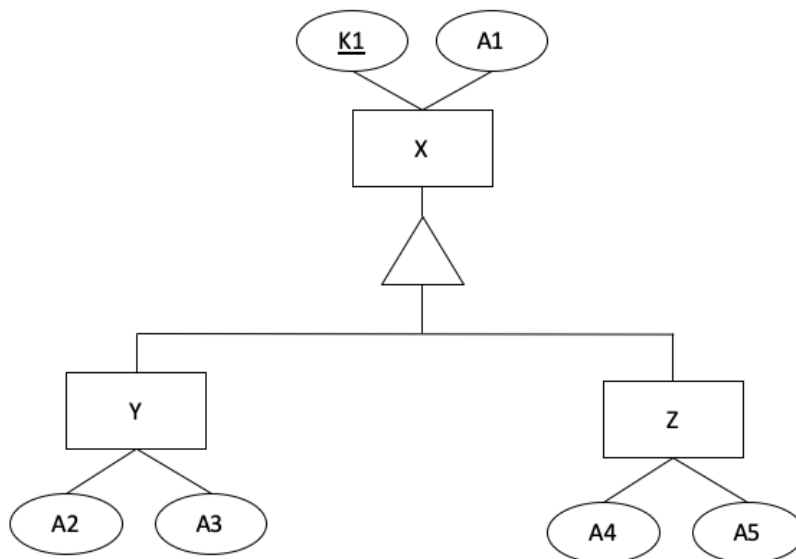

$R(\underline{K1}, \underline{K2})$

OR

$X(\underline{R1-K1}, A1)$

$R(\underline{R1-K1}, \underline{R2-K1})$

9) ISA 1

$X(\underline{K1}, A1)$

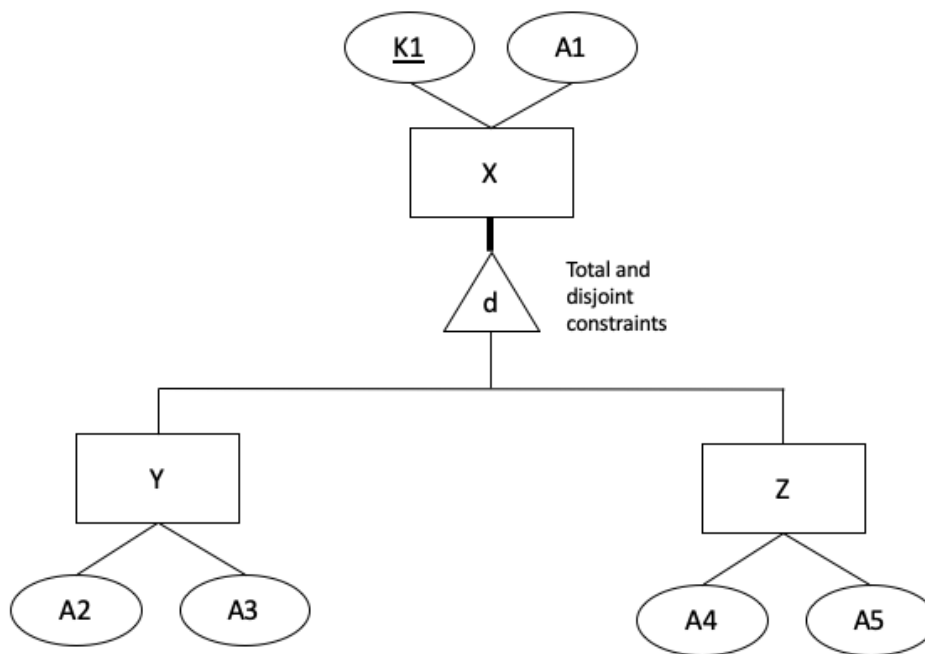

$Y(\underline{K1}, A2, A3)$

$Z(\underline{K1}, A4, A5)$

CPSC 304: Introduction to Relational Databases

Tutorial #2: Logical Database Design

10) ISA 2 (the “d” means disjoint)

Y(K1, A1, A2, A3)

Z(K1, A1, A4, A5)
